DIV. OF OIL, GAS & MINING

RE: Mineral Materials Permit Application ML 48980-MP

Dear Mr. Day:

The Utah Resource Development Committee has completed its review of your application for a Mineral Materials Permit in Sanpete County.

The Division of State History concurs that no historic properties will be effected in the subject lands. This determination allows me to rescind the former request that you perform for a cultural resources survey.

The Utah Geological Survey requests that a paleontological survey of Eocene Green River Formation outcrops within the subject lands be performed. It is highly likely, however, that vertebrate fossils may be found within the proposed permit area. Nevertheless, I ask that you immediately cease work and notify the Utah Geological Survey of any rare or unusual fossil finds within the subject lands.

The Division of Oil, Gas & Mining comments that you have not filed an amended notice of intent to your mining permit issued by that office. You must immediately notify DOGM and obtain an amended permit to disturb the trust lands that are within your application, and adjacent to your current mining permit. Please provide this office with evidence of such notification so that I may continue processing your application.

Sincerely,

John T. Blake  
Mineral Resources Specialist
